Summary

Front-end developer with experience in JavaScript, React, and Next.js. Passionate about building scalable and modern web applications. Skilled in state management, UI/UX design, Currently expanding knowledge in AI-powered applications and full-stack development with Next.js API routes, Firebase, and Prisma. Seeking a front-end or full-stack developer role to contribute expertise and grow in a fast-paced environment.

Experience

Network for Children's Empowerment Sierra Leone (NetCE-SL)
Web Developer & Steering Committee Member *(2024 – 2025)*

- I designed and maintained the organization's website to enhance its digital presence. As a steering committee member, I played a key role in planning and executing the 1st Kenema SRHR Summit, supporting fundraising, logistics, and community outreach efforts. Additionally, I provided technical support for digital advocacy and communications.

Skills

- **Front-end: JavaScript, TypeScript, React, Next.js, Zustand, Framer Motion**
- **Styling: Tailwind CSS, ShadCN, CSS, HTML**
- **(Learning)Backend: Next.js API Routes, Prisma Firebase**
- **Other Tools: Git, AI APIs,DSA,Design patterns, Testing**

Projects

✅**Real Estate Website-**A real estate website built using React, Tailwind CSS, and Framer Motion for smooth animations and dynamic interactions. The website showcases a modern and responsive user interface for browsing properties.

✅**Brainwave -** Developed a modern website featuring sleek parallax effects and a bento box layout. This project focuses on stylish UI design, mobile-first principles, and performance optimization while leveraging React.js and Tailwind CSS to create a seamless user experience.

✅ **SaaS Landing Page –** A modern, conversion-optimized SaaS landing page built with React, Next.js, and Tailwind CSS. Implements mobile-first design, dynamic sections, and SEO optimizations for better visibility and engagement.

✅ **Gaming Platform UI –** A gaming platform UI showcasing top-rated games, built with React, Next.js, Redux, and Chakra UI. Includes dynamic filtering, search functionality, API integration, and a responsive layout for an immersive user experience.
